The leading voice for the student affairs profession worldwide.

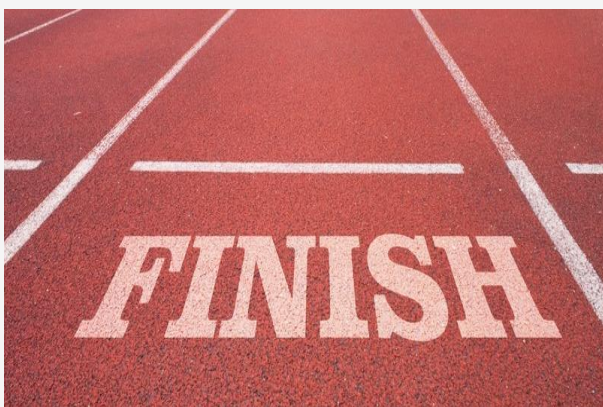

FAREWELL FROM YOUR REGIONAL DIRECTOR

March is upon us! March signifies so many things: midterms, spring break, NASPA national conference, rain and warmth returning, prepping for various end of the year events, and transitions. I am beyond excited for the national conference. This has been a stressful academic year on my campus and I know many share this experience as well. But I am looking forward to focusing on NASPA and stepping away from my campus for a short time. I cannot wait to see old colleagues, interview excited professionals at TPE, attend multiple events, present to my peers, and learn and challenge myself in my current professional journey. I feel blessed to work with some great people at NSU but while I am excited about all we are doing, I am always looking to what and where we need to head next. I hope we get to spend some quality time socializing or just hanging out at the national conference. [For rest of Blog, click here.](#)

JUST A STUDENT LOOKING FOR A LITTLE DIRECTION

We all know those students who step on to our campuses looking for a little direction. As educators and student affairs professionals, I am confident that each of you have reached out and provided that much needed direction. In fact, I would be willing to bet you can identify those students right now. I'm sure you can recall the countless students, conversations, emotions, and pure enjoyment. Thank you for taking the time to serve that student. You made a difference and will always be remembered for your contagious passion to elevate the success of students. CHANGING THE NARRATIVE ON "WINNING THE RACE"

When I graduated from college, I thought I had won the race. I literally "jumped for joy" when I crossed the stage: I screamed, I shouted, and I even did a little happy dance. And somewhere between my happy dance and glancing back at the graduating class, I realized that I was alone. You see, many of the students—whom I had befriended along the way (that I had met at new student orientation, in my freshmen general education courses, or in the dorms)—were not with me. While running the race, I seemed to have forgotten that while winning the race (getting across the finish line first) was important, it was not more important than making sure that others in the race gets to the finish line as well.
